

Bio-LS(F)

FERTILIZER COMPATIBILITY IMPROVER

Bio-LS(F) is a wood vinegar with beneficial applications in agriculture. Wood vinegar stimulates cell growth and acts as a catalyst for developing several microbes and activating enzymes. The latter is essential for plants' physiological and biochemical processes, such as photosynthesis, nutrient uptake, and cell growth. Bio-LS(F) is designed as a fertilizer additive that improves fertilizer application and compatibility.

Elevate Ag is making a positive impact in the world of agriculture. With innovative ideas and cutting-edge technology, we are revolutionizing how food is grown and helping farmers increase their yields and profits. We offer products that ensure a more vibrant, productive, and sustainable future for farmers and their communities.

Bio-LS(F)

FERTILIZER COMPATIBILITY IMPROVER

BIO-LS(F) is a 2.8% liquid solution of plant derived fulvic acids for conventional application and is a fulvic acid-based fertilizer additive that is designed to improve fertilizer application and compatibility

Benefits:

- Serves as an organic fertilizer and fertilizer enhancement
- Stimulates plant growth and development
- Acts as a biopesticide
- Functions as an antimicrobial agent
