

Fish Force

BIOLOGICALLY ACTIVE FISH FERTILIZER

Fish Force is a naturally fermented whole salmon. The unique properties of the salmon's pink flesh and high fat content means Fish Force is unlike any other fish product on the market. The high volatile fatty acid [VFA] content (over 70%a) results in increased biological activity and improved nutrient uptake for your seedling or established crop. You can use Fish Force at planting and throughout the growing season. It can be used: in-trench as part of your starter blend; during the growing season as a component of foliar sprays and to boost forage quality/production as a spring/after-cut foliar.

Elevate Ag is making a positive impact in the world of agriculture. With innovative ideas and cutting-edge technology, we are revolutionizing how food is grown and helping farmers increase their yields and profits. We offer products that ensure a more vibrant, productive, and sustainable future for farmers and their communities.

Fish Force

BIOLOGICALLY ACTIVE FISH FERTILIZER

Fish Force is a naturally fermented whole salmon fertilizer with high volatile fatty acid content, promoting increased biological activity and nutrient uptake in seedlings and established crops.

Benefits:

- Promotes larger root mass and increased yield
- Leads to higher quality forages/pastures
- Provides your crops with compounds that trigger their natural immune responses
- Stimulates beneficial soil organisms that support plant health and release nutrients
