

Growthful Pre-Emerge MAX

NUTRIENT LIBERATOR

Growthful Pre-Emerge MAX is an inorganic soil amendment that, when applied to soil, liberates bound-up Phosphorus (P), Potassium (K), and other macro and micronutrients. Growthful has high concentrations of stabilized Hydrogen (H), whose positive charges become catalysts for freeing up nutrients that are part of nature or have been added by farmers to improve fertilization. Growthful acts like nature's buffering systems by regulating nutrient availability through complex chemical reactions as a carbonic acid generator. The results are dramatic in the release of bound-up nutrients; the positive ions break up carbonates and allow previously bound nutrients to become available for healthy plant growth.

Elevate Ag is making a positive impact in the world of agriculture. With innovative ideas and cutting-edge technology, we are revolutionizing how food is grown and helping farmers increase their yields and profits. We offer products that ensure a more vibrant, productive, and sustainable future for farmers and their communities.

Growthful Pre-Emerge MAX

NUTRIENT LIBERATOR

Growthful Pre-Emerge MAX liberates bound-up Phosphorus, Potassium, and other nutrients. It contains stabilized Hydrogen that catalyzes the release of naturally occurring or added nutrients to improve fertilization.

Benefits:

- Liberates important micro and macro nutrients bound up in the soil
- Regulates nutrient availability
- Serves as a carbonic acid generator
- Contributes to healthy plant growth
- Results in higher yields
