

# Halo 9.5

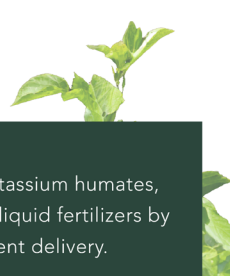

## HUMATE-BASED FERTILIZER ADDITIVE

Halo 9.5 (HumiSource) is rich in humic and fulvic acids. As a fertilizer additive, these improve a crop's ability to absorb nutrients, resulting in faster growth, healthier plants and higher yields. Humates are commonly used as a soil amendment. They add organic matter to marginal soils, improving texture, moisture-holding capacity, and pH stability.

Elevate Ag is making a positive impact in the world of agriculture. With innovative ideas and cutting-edge technology, we are revolutionizing how food is grown and helping farmers increase their yields and profits. We offer products that ensure a more vibrant, productive, and sustainable future for farmers and their communities.

# Halo 9.5

## HUMATE-BASED FERTILIZER ADDITIVE

Halo 9.5 is a specially formulated blend of potassium humates, including humic and fulvic acids, for use with liquid fertilizers by blenders and manufacturers to enhance nutrient delivery.

### Benefits:

- Influences soil texture and water retention
- Aids in the formation of stable humus
- Allows beneficial microbes to flourish
- Enhances nutrient delivery to plant roots
- Chelation increases bioavailability of essential nutrients
