

# HyprCycle+

## NUTRIENT RECYCLER

HyprCycle+ naturally speeds up residue digestion, increases organic matter in the soil and reduces volatilization of essential nutrients. HyprCycle+ is intended to prime the soil prior to planting or assist with residue breakdown after harvest. This dynamic stimulant is going to give your soil the tools it needs to unlock tied-up nutrients and recycle them into plant available forms. HyprCycle+ has been known to quickly bring back earthworm populations to soils where they have been absent for extended periods of time.

Elevate Ag is making a positive impact in the world of agriculture. With innovative ideas and cutting-edge technology, we are revolutionizing how food is grown and helping farmers increase their yields and profits. We offer products that ensure a more vibrant, productive, and sustainable future for farmers and their communities.

# HyprCycle+

## NUTRIENT RECYCLER

HyprCycle+ naturally speeds up residue digestion, increases organic matter in the soil and reduces volatilization of essential nutrients. Recycles excess nutrients to prime the soil for planting.

### Benefits:

- Capitalize on your inputs and return those essential nutrients to the soil
- Soften residue to plant more consistently and emerge more uniform
- Improves soil structure by increasing carbon capture of residue
- Assists with mining nutrients during the dormant season
- Meant to be split applied and makes your herbicides, fertilizers, insecticides and other nutritional sprays more effective
