

Molasses

NATURAL CARBOHYDRATE SOURCE

As a soil amendment and fertilizer ingredient, molasses offers several benefits. Blackstrap molasses is high in calcium, magnesium, iron, potassium, sulfur, sugar, and a whole host of micronutrients – making it one of the most cost-effective organic fertilizers available. Adding molasses to soil has been shown to improve the bacterial health of the soil, thus allowing the plants to be more receptive to fertilizer and, in general, to be healthier.

Elevate Ag is making a positive impact in the world of agriculture. With innovative ideas and cutting-edge technology, we are revolutionizing how food is grown and helping farmers increase their yields and profits. We offer products that ensure a more vibrant, productive, and sustainable future for farmers and their communities.

Molasses

NATURAL CARBOHYDRATE SOURCE

Benefits:

- By providing carbohydrates to breakdown in soil, the molasses improves the health of microorganisms in the ground.
- Has insecticidal benefits, offering an organic, non-chemical answer to pest control problems.
- Can reduce “leaching” of vital soil nutrients as well as accelerate fodder break down for healthier soil.
- Makes fertilizer more effective, which is a real cost saving measure.
- Makes an excellent spreader sticker/surfactant that is ideal for a foliar application and/or in farrow during planting.
